PROFESSIONAL SUMMARY

Final-year student in a Technical High School program in Information Technology, dedicated and collaborative, with knowledge in both front-end and back-end and an ongoing path toward full-stack development. I build complete, responsive websites and web applications with React, Next.js, TypeScript, and Tailwind CSS, along with back-end projects in Node.js and MySQL, experience across different languages (Java, Python, C++), and a foundation in UX/UI. Driven by challenges and by building solutions that improve the user experience, I am looking for my first professional opportunity (internship or junior role) to apply what I already know and grow as a professional.

EDUCATION

Technical Diploma in Information Technology, integrated with High School Jan 2024 – Dec 2026
Centro Universitário Adventista de São Paulo (UNASP) — São Paulo, Brazil

- Technical program integrating programming, web development, databases, and networking with high school education.
- Expected graduation in December 2026 (currently in the 3rd and final year).

PROJECTS

NewsDev — Founder & Developer
newsdev.com.br

- SaaS product for developers: an aggregator that unifies news and feeds (RSS, GitHub, Reddit, and YouTube) into a single timeline.
- Responsible for concept, development, and product model, from scratch to the pre-launch stage.

Ringly — Author · TypeScript
github.com/Nickdevcode/Ringly

- Cross-platform native notifications tool, with internationalization support (pt-BR / en-US).
- Built in TypeScript, with clean code organization and project documentation.

Personal Portfolio — Responsive Web Development
portnick.vercel.app

- Responsive personal website built with HTML, CSS, and JavaScript, showcasing projects, skills, and background.
- Deployed on Vercel.
